

VMware Horizon 7: Install, Configure, Manage [V7.10]

VMware Horizon 7: Install, Configure, Manage [V7.10]

За Курса (About this Course):

- This five-day, hands-on course gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. This course builds your skills in installing, configuring, and managing VMware Horizon® 7 through a combination of lecture and hands-on labs. You learn how to configure and deploy pools of virtual machines, how to manage the access and security of the machines, and how to provide a customized desktop environment to end users.

Цели – Какво ще научите (Course

Goals/Skills):

- By the end of the course, you should be able to meet the following objectives:
 - Recognize the features and benefits of VMware Horizon
 - Install and configure View Connection Server
 - Create and optimize Windows VMs to create VMware Horizon desktops
 - Describe the purpose of Horizon Agent
 - Compare the remote display protocols that are available in VMware Horizon
 - Configure and manage the Horizon Client systems and connect the client to a VMware Horizon desktop
 - Configure, manage, and entitle automated pools of full VMs
 - Configure, manage, and entitle pools of instant-clone desktops and linked-clone desktops
 - Install and configure View Composer
 - Outline the steps and benefits for using TLS CA signed certificates in VMware Horizon environments
 - Use the role-based delegation to administer a VMware Horizon environment
 - Configure secure access to VMware Horizon desktops
 - Understand and create Remote Desktop Services (RDS) desktops and application pools
 - Install and configure VMware App Volumes™ to deliver and manage applications
 - Deploy VMware Dynamic Environment Manager for user and application management
 - Install and configure a Just-in-Time Management Platform (JMP) server for managing JMP components
 - Describe VMware Dynamic Environment Manager™ Smart Policies
 - Use the command-line tools available in View to back up and restore the required VMware Horizon databases

- Manage the performance and scalability of a VMware Horizon deployment
 - Identify the benefits of the Cloud Pod Architecture feature for large-scale VMware Horizon deployments
-

Курсът е предназначен за (Audience):

- Technical personnel who work in the IT departments of end-customer companies and people who are responsible for the delivery of remote or virtual desktop services
-

Формат на курса

Присъствен Курс

Онлайн (Live)

Отдалечен

Език на курса: български (английски е наличен като опция)

Учебни Материали: в електронен формат (Учебните материали са на английски), включени в цената с неограничен достъп.

Лабораторна среда: всеки курсист разполага със собствена лаб среда, където се провеждат упражненията, част от курса.

Предпоставки (Изисквания) за Участие (Prerequisites):

- Customers attending this course should have, at a minimum, the following VMware infrastructure skills:
 - Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
 - Open a virtual machine console on VMware vCenter Server® and access the guest operating system
 - Create snapshots of virtual machines
 - Configure guest customization specifications
 - Modify virtual machine properties
 - Convert a virtual machine into a template
 - Deploy a virtual machine from a template
- Attendees should also have the following Microsoft Windows system administration experience:
- Configure Active Directory services, including DNS, DHCP, and time

synchronization

- Restrict user activities by implementing Group Policy objects
 - Configure Windows systems to enable Remote Desktop Connections
 - Build an ODBC connection to an SQL Server database
-

Курсът подготвя за следните сертификационни нива

- **VMware Certified Professional – Desktop and Mobility 2020 (VCP-DTM 2020)**
- След този курс може да се сертифицирате в нашия тест център.
