

CompTIA A+

CompTIA A+

CompTIA A+ 2019 220-1101/220-1102

About this Course:

- In this course that's focused on CompTIA A+ certification exam preparation, you'll gain the needed knowledge of basic computer hardware and operating systems. You will cover the essential principles of installing, building, upgrading, repairing, configuring, troubleshooting, optimizing, and preventative maintenance on desktop and laptop computers. You will also learn the elements of customer service and communication skills necessary to work with clients. Instructor-led practice exams and quizzes help reinforce course concepts and exam readiness.

Course Goals:

- Prepare for the latest A+ certification exams.
Support basic IT infrastructure, including endpoint

management, advanced device connectivity troubleshooting, and basic networking. Configure and support PC, mobile and IoT device hardware, including components, connectors and peripherals. Implement basic data backup and recovery methods and apply data storage and management best practices. Demonstrate baseline security skills for IT support professionals, including detecting and removing malware, addressing privacy concerns, physical security and device hardening. Configure device operating systems, including Windows, Mac, Linux, Chrome OS, Android and iOS and administer client-based as well as cloud-based (SaaS) software. Troubleshoot and problem solve core service and support challenges while applying best practices for documentation, change management, and the use of scripting in IT support.

Audience:

- Individuals seeking CompTIA A+ certification (220-1101 and 220-1102)
-

Course Format:

	
Присъствен (Classroom) Курс в Учебната ни зала или В Офис на Клиент	Онлайн (Online/Virtual) Курс във виртуална зала с инструктор
