ISO 37001 Lead Auditor (PECB)

About this Course:

Many organizations seek competent auditors to determine whether the policies and anti-bribery controls, implemented as part of an ISO 37001-based ABMS, are effective. This training course aims to help you complete these tasks successfully and intends to reflect the importance of effective ABMS audits. The exercises, quizzes, and case studies provided are designed to help you practice the most important aspects of an ABMS audit: ISO 37001 requirements, auditing principles, tools and

techniques used to obtain evidence, leading a team of auditors, conducting interviews with auditee, reviewing documented information, drafting nonconformity reports, and preparing the final audit report.

The successful completion of the training course is followed by an exam. If you pass the exam, you can apply for the “PECB Certified ISO 37001 Lead Auditor” credential.
