

Microsoft 10961 Automating Administration with Windows PowerShell

Microsoft Official Course

10961 Automating Administration with Windows PowerShell

About this Course:

In this training course, you will gain the fundamental knowledge and skills to use Windows PowerShell for automating the administration of your Windows-based servers. You will focus on primary Windows PowerShell command line features and techniques. Learn to execute and monitor scripts more efficiently with more robust session connectivity, workflow capabilities, improved job scheduling, and Windows PowerShell Web Access.

This course incorporates materials from the Official Microsoft Learning Product M10961: Automating Administration with Windows PowerShell, and is taught by official Microsoft instructors.

Course Goals/Skills:

- Basic concepts behind Windows PowerShell
 - Work with the Windows PowerShell Pipeline
 - Use PSProviders and PSDrives to work with other forms of storage
 - Format output
 - Use Windows Management Instrumentation (WMI) and Common Information Model (CIM)
 - Prepare for scripting
 - Moving from a command to a script to a module
 - Administer remote computers
 - Put the various Windows PowerShell components together
 - Use background jobs and scheduled jobs
 - Use advanced PowerShell techniques and profiles
-

Audience:

- Windows Server Administrators, DevOps Engineers
-

Course Format:

	
Присъствен (Classroom) Курс в Учебната ни зала или В Офис на Клиент	Онлайн (Online/Virtual) Курс във виртуална зала с инструктор

Course Language Option:

	
Български (Bulgarian)	Английски (English)

You can choose the language in which the training will be conducted – Bulgarian or English. All our instructors are fluent in English.
