

PAL-EBM -PROFESSIONAL AGILE LEADERSHIP™ – EVIDENCE-BASED MANAGEMENT TRAINING

Professional Agile Leadership – Evidence-based Management Training

About this Course:

- With markets and customer needs constantly changing, organizations need information and evidence that helps them adapt quickly to new challenges and opportunities so that they can deliver greater value and achieve true business agility. Yet often organizations that use Agile product development techniques use traditional management approaches, expecting leaders to set firm long-term goals and manage progress toward them with dashboards of static metrics. That is why Scrum.org created the Evidence-Based Management™ (EBM) framework which is an Agile approach to help leaders guide their teams toward continuously improving customer outcomes, organizational capabilities, and business results. EBM focuses on customer value and intentional

experimentation to systematically improve an organization's performance and achieve their strategic goals.

Course Goals:

- Use empiricism to set and achieve strategic goals, managing the unknown and complexity through experimentation and by adapting goals along the way
 - Create a cultural environment using clear goals, appropriate measures and trust to enable self-management and autonomy
 - Shift the conversation away from measuring progress purely through team performance metrics, toward a focus on customer-centricity and improving customer outcomes
 - Drive operational improvements by using four Key Value Areas (Unrealized Value, Current Value, Time to Market, and the Ability to Innovate) as lenses for evidence-based decision-making
-

Audience:

- Understand the essential aspects of goals and measures and how they influence behaviors and an organization's culture and values
- Help organizations embrace empiricism as a leadership approach. Using experimentation to incrementally steer toward the organization's goals
- An appreciation for how goals and trust act together to enable autonomy, transparency, and value delivery
- Correlate market leadership and sustainability to

curiosity, adaptation, and empiricism

- Understand how to use EBM and its KVAs to focus measurements on improving market value and operational capabilities
