

RH134 – Red Hat System Administration II

Red Hat

RH134 – Red Hat System Administration II

About this Course:

- 5 Days
- Instructor-led training
- Intermediate
- English

Red Hat System Administration II (RH134) serves as the second part of the RHCSA training track for IT professionals who have taken [Red Hat System Administration I \(RH124\)](#). The course goes deeper into core Linux system administration skills in storage configuration and management, installation and deployment of Red Hat® Enterprise Linux®, management of security features such as SELinux, control of recurring system tasks, management of the boot process and troubleshooting, basic system tuning, and command-line automation and productivity. .

Experienced Linux administrators looking for rapid preparation for the RHCSA certification should

instead start with RHCSA Rapid Track (RH199).

This course is based on Red Hat Enterprise Linux 8.2.

Course Goals/Skills Gained:

- Install Red Hat Enterprise Linux using scalable methods
 - Access security files, file systems, and networks
 - Execute shell scripting and automation techniques
 - Manage storage devices, logical volumes, and file systems
 - Manage security and system access
 - Control the boot process and system services
 - Running containers
-

Audience:

- This course is geared toward Windows system administrators, network administrators, and other system administrators who are interested in supplementing current skills or backstopping other team members, in addition to Linux system administrators who are responsible for these tasks:
 - Configuring, installing, upgrading, and maintaining Linux systems using established standards and procedures
 - Providing operational support
 - Managing systems for monitoring system performance and availability
 - Writing and deploying scripts for task automation

Course format

Attendance Course

Online
